NUST Journal of Social Sciences & Humanities

NUST Journal of Social Sciences and Humanities (NJSSH) is a peer-reviewed and refereed journal published by the School of Social Sciences and Humanities, National University of Sciences and Technology (NUST), Islamabad, Pakistan. The main objective of NJSSH is to provide a scholarly platform for the national and international scholars. NJSSH aims to promote scholarly, pragmatic, and contemporaneous interdisciplinary studies in social sciences and humanities. The journal publishes research papers in the fields of social science and humanities such as anthropology & sociology, behavioral sciences, demography & gender studies, development studies, economics, government & public policy, and mass communication. The journal is published in both print and online versions. NJSSH is a bi-annual journal. NJSSH publishes original papers with sound and conceptual framework, analytical and simulation models, case studies, empirical research, technical notes, and book reviews. Special issues devoted to important topics in social sciences and humanities will occasionally be published.

Submission Abstract

In contrast to the much-studied external factors as determinants of SME success, the current study brought focus on the entrepreneurial psychological context. This research examines the impact of individual entrepreneurial orientation on the success of SMEs in Pakistan. Moreover, this study emphasizes the role of "gender" as a moderating factor on entrepreneurial activities. Though the role of entrepreneurial success in financial, social, and environmental performance, and response performance. Based on 100 responses obtained through a stratified sample of manufacturing SMEs, multiple regression analysis was conducted for the model. The results indicated that individual entrepreneurial orientation (innovativeness, risk-taking, proactiveness) across all the other characteristics across all the other variables (innovativeness, risk-taking, proactiveness) mediate the relationship. The study theoretically contributes to entrepreneurship studies by suggesting that individual entrepreneurial orientation (innovativeness, risk-taking, proactiveness) mediate the relationship.

Paper Title: Action Characteristics as a Bridge in Individual Entrepreneurial Orientation and SME Success Pathway

Paper ID: 10747-47-1030-2024

Author's Email : mntan.wrt@gmail.com

Abstract

In contrast to the much assumed external factors as determinants of SME success, the present study brought focus on the entrepreneurial psychological context. This research examines the impact of individual entrepreneurial orientation on the success of SMEs in Pakistan. Moreover, this study emphasizes the role of "action" as a linking bridge in entrepreneur factor-environmental ecosystem. Through the role of action characteristics across its finance, social network, exploration activities, and resource performance, based on SME responses obtained through a validated survey of manufacturing SMEs, authors hypothesized authors can add to test the model. The results indicated that individual entrepreneurial orientation had a positive impact on SMEs success and all of the action characteristics (social network, social network, exploration activities, and resource performance) mediated this relationship. The study theoretically contributes to another perspective, action-regulation theory and orientation-action outcome perspective and offers implications for SME owners, SMEs and training professionals.

KEYWORDS: Small and medium enterprises, action characteristics, individual entrepreneurial orientation, success.

Step 4 – Funding information

The screenshot shows the 'Funding Information' step in a 10-step submission process. The progress bar at the top indicates that steps 1 through 3 are completed, step 4 is the current step, and steps 5 through 10 are yet to be completed. Below the progress bar, the title 'Funding Information' is displayed. A red warning box states: 'Funding Information is Required for Submission.' Below this, a yellow information box provides instructions: 'Please provide your funder name, grant number and the grant recipient. If a funder name is not applicable for your manuscript, please select the corresponding checkbox. Authors listed in the dropdown menu were added during the Add/Edit/Remove Authors submission step. Click the '+' icon to add another funder. When you are finished, click the 'Next' button.' Below the information box, there is a checkbox labeled 'Funding information is not applicable / No funding was received' which is currently checked. To the right of this checkbox, a red text annotation reads: 'Add funding information which is required for submission'. Below the checkbox is a button labeled '+ Add a Funding Source'. At the bottom of the form, there are 'Previous' and 'Next' buttons.

Step 5 - Enter the abstract of your manuscript

The screenshot shows the 'Submit Abstract' step in a 10-step submission process. The progress bar at the top indicates that steps 1 through 4 are completed, step 5 is the current step, and steps 6 through 10 are yet to be completed. Below the progress bar, the title 'Submit Abstract' is displayed. A red warning box states: 'Submitting an Abstract is Required for Submission.' Below this, the text reads: 'Enter the abstract of your manuscript into the text box below. The abstract may be cut and pasted from a word processing program; however, the formatting will be lost.' Below this text, the title 'Submission Abstract' is displayed. A large text box contains the following text: 'Analytics companies develop the ability to support their decisions through analytic reasoning using a variety of statistical and mathematical techniques. Thomas H. Davenport in his book titled, "Competing on analytics: The new science of winning", claims that a significant proportion of high-performance companies have high analytical skills among their personnel. On the other hand, a recent study has also revealed that more than 59% of the organizations do not have information required for decision-making. Learning "Data Analysis" with R not only adds to existing analytics knowledge and methodology but also equips with exposure into latest analytics techniques including forecasting, social media analytics, text mining & so on. It gives an opportunity to work on real time data from Twitter, Facebook & other social networking sites.' At the bottom of the form, there are 'Previous' and 'Next' buttons.

Step 6 - Enter keyword separated by comma

The screenshot shows the 'Enter Keyword' step in a 10-step submission process. The progress bar at the top indicates that steps 1 through 5 are completed, step 6 is the current step, and steps 7 through 10 are yet to be completed. Below the progress bar, the title 'Enter Keyword' is displayed. The text reads: 'Enter Keywords separated by comma. e.g., active vitamin D, parathyroid hormone-related peptide, hypercalcemia, bone resorption. Each individual keyword may be up to 256 characters in length. Maximum 5 and Minimum 3 Keywords.' Below this text, the title 'Please Enter Keywords' is displayed. A text box contains the following text: 'Analytics, companies, develop'. At the bottom of the form, there are 'Previous' and 'Next' buttons.

Abstract

Analytics companies desire this ability to support their customers through analytic reasoning using a variety of statistical and mathematical sub-problems. Thomas H. Davenport in his book titled, "Competing on Analytics: The new frontier of winning", claims that a company's consistent high performance over time has high correlation with strong analytics. On the other hand, a recent publication has revealed that more than 70% of the organizations do not have information required for publishing using "Data Analytics with R" not only adds to existing analytics knowledge and understanding, but also provides low-level analytics techniques including forecasting, spatial events analysis, and network analysis. It gives an opportunity to work on real-time data from Twitter, Facebook & other social networking sites.

KEYWORDS: analytics, companies, develop

Title

Manualizing Factor Analysis of Likert Scale Data

Keywords

Likert scale, factor analysis, validity, multi-scale data analysis

Abstract

Despite the academic value of factor analysis (FA) on Likert scale data, its statistical validity has been repeatedly questioned by professional statisticians. This article reviews relevant literature and proposes a statistically appropriate method of getting most out of FA on Likert scale. The review shows that a larger sample size is an important consideration in improving the appropriateness of FA on Likert scale as it improves the solution in terms of normality, communalities and loadings. Further, a 10-point or greater scale is required to account for normality, an alpha level of 0.01 or 0.005, polynomial correlation instead of Pearson's are required to improve the statistical appropriateness of the test of Likert scale. Moreover, using non-parametric alternatives like GUTPCA to verify the results of FA greatly increased the overall value and validity of the test.

[Evaluate](#)

- Details of the paper the reviewer is assigned to evaluate. In other word you can simply edit your review and add into new submission.
- After evaluating it leads you to the evaluation screen.

- Evaluation screen of each paper includes the [manuscripts](#), [download](#) options from documents, various question and answers along with comment box to each topic.

5. How to create your own journal?

If you want to create your own journal, you will be providing the following details to admin:

- ✓ Basic introduction
- ✓ Email address
- ✓ Journal name
- ✓ Editorial team
- ✓ Logo

After providing the above details, you will receive login
